

The Albany County Sheriff's Office offers an excellent opportunity for students to participate in a criminal justice internship program. The Sheriff's Office is a large agency with a broad scope of responsibilities extending well beyond law enforcement. This diversity allows intern students to experience a wide range of possible assignments including Sheriff's patrol, corrections, communications, court security, and emergency management operations.

Applications will be accepted in the form of an email with the following information included:

- "ACSO Internship" should appear on the subject line
- Include personal and professional strengths along with future aspirations within the criminal justice field
- Provide the desired semester as well as an indication of availability since nights and weekends may be required
- State how many internship hours are required by the academic institution
- Please provide a resume or an outline of your work and education experience as an attachment to the email

Applications should be sent to Investigator Tracy Mance at Tracy.Mance@albanycounty.com.

Applications will be reviewed and an interview appointment will be scheduled. We receive many requests and accept a limited number of students per semester. It is best to be accepted the semester before so that accumulation of hours can start at the beginning of the next semester.
