

CORNELL COOPERATIVE EXTENSION - 8753

MISSION

The mission of Cornell Cooperative Extension of Albany County, a dynamic community-based organization, is to use its experience and research capabilities to provide for better living through its work with individuals, families, businesses and communities.

ABOUT OUR DEPARTMENT

Cornell Cooperative Extension conducts educational and assistance programs in the following areas:

The **Agriculture Program** works with Albany County's farm and horticulture businesses to help ensure their profitability by implementing up-to-date best management practices and techniques, developing effective market strategies, advising policy makers on issues critical to agriculture and emphasizing the importance of the relationship between the environment and agricultural production practices. Home gardeners receive assistance from Master Gardener Program volunteers, who provide advice on best management techniques in the garden. In every case, research-based knowledge from Cornell University is used.

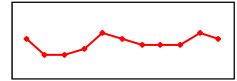

The Agriculture staff works, in partnership with other Albany County departments, to implement pesticide regulation and reduction legislation for County facilities. Working with the Albany County Department of Economic Development, Conservation, and Planning, Cornell Cooperative Extension has developed a farmland and open space protection plan. The plan makes Albany County eligible for funding for farmland preservation activities.

The **Community Resource Development Program (CRD)** includes programs focusing on small business development and governmental education. CRD has begun work on a research-action project to improve indoor air quality and energy efficiency in Albany County homes.

The **4-H and Youth Development Program** develops and supports the 4-H club system in Albany County, a volunteer-powered program that helps youth and families learn together. 4-H also conducts special after-school and summer learning experiences for youth in at-risk areas of the County and a summer education day camp in the City of Albany.

The **Human Ecology Program** focuses on the family and conducts major health and nutrition programs in areas such as women's health, eating disorders, dietary guidelines, reducing chronic disease and nutrition education for families with limited incomes. The program works with the Department of Social Services on Welfare-to-Work initiatives. Human Ecology also provides assistance in family management, positive child guidance and discipline, and balancing work and family. Human Ecology has recently been notified of grant awards to conduct educational programs on childhood obesity and how beginners can establish and manage bank accounts.

APPROPRIATION HISTORY

1998:	\$1,422,457
